

Wheel Support Adapter/1000KG x 4

Features

- Easy to replace the normal lifting pads.
- Suitable for ultra-low chassis vehicles ($\leq 85\text{mm}$) and E-vehicles, can provide a larger work space for battery replacement.
- The wheel support adapter is suitable for tire sizes of 13"-20" (350-600mm) and can be quickly connected to the end of the lifting arm.
- Suitable for all models of EAE two post lifts under 4000kg, and the lifting weight of a single tire bracket is 1000kg.
- The standard arm of EAE lifts with this adapter and can be applied to cars with a wheelbase within 2650mm. Lengthened lifting arm can be applied to cars wheelbase under 2900mm.
- Compared with four post lifts, big scissor lifts and other tire contact lifts, its space occupation is the smallest.
