

HIGH DELIVERY AIR-OPERATED OIL PUMPS Mod.805

COMPRESSION RATIO = 5:1

DELIVERY CAPACITY = 35 l/min

Art. 020-1180-000

Double-acting air-operated oil pump Mod.805
ratio=5:1 Delivery capacity 35 l/min

For wall-fixing or fixed positions.

With additional accessories it allows to make different applications.

Polyurethane seals

Art. 020-1182-000

Double-acting air-operated oil pump Mod.805
ratio=5:1 Delivery capacity 35 l/min

For standard drums of 180-220 l

(shank length 940 mm)

Polyurethane seals

Art. 020-1183-000

Double-acting air-operated oil pump Mod.805
ratio=5:1 Delivery capacity 35 l/min

For standard tanks of 750-1500 l

(shank length 1250 mm)

Polyurethane seals

With threaded ring for drum connection.

They are suitable for workshops oil distribution applications for industrial vehicles in which it is requested a high delivery with more dispensing points.

These pumps are advised for the transfer of medium-high viscosity oil (SAE 15/240) and anti-freeze, for medium-long distances (150 - 200 m). The delivery capacity of a pump varies according to particular applications and combinations: the pressure of air supplied; viscosity and temperature of the fluid; dimensions of delivery hose; dimensions of connections and type of gun which is used. The operating pressure may vary between a minimum of 3 bar and a maximum of 8 bar. The double-acting guarantees the delivery of a continuous and constant flow, suitable for installations on distribution facilities. To optimize the performance and the time-life of the air-operated pumps we advise to use filtered and lubricated air.
