

CUBEONE

Stationary car depollution module

A space-saving and efficient system, equipped with high quality components. Individual combination options, adapted to the needs of the customer. A compact solution to also equip smaller recycling companies.

> Configuration:

- petrol-/ diesel- tank drilling device to absorb liquid and gaseous substances
- probe set for all liquids
- 4x hose reel
- 4x membrane pump

> Technical datas:

- L x W x H: 110cm x 85cm x 180 cm
- Weight: 600 kg
- Processing time: 15 min/ Car
- Air requirement: 8 bar, 350l/ min

The Innovation of car depollution

OPTIONEN:

Fuel cylinder for cleaning of petrol and diesel

Automatic nozzle for re-use

Three-way control of the liquid

Oil suction trolley with pump
