

KOMPAKT D

Stationary car depollution module

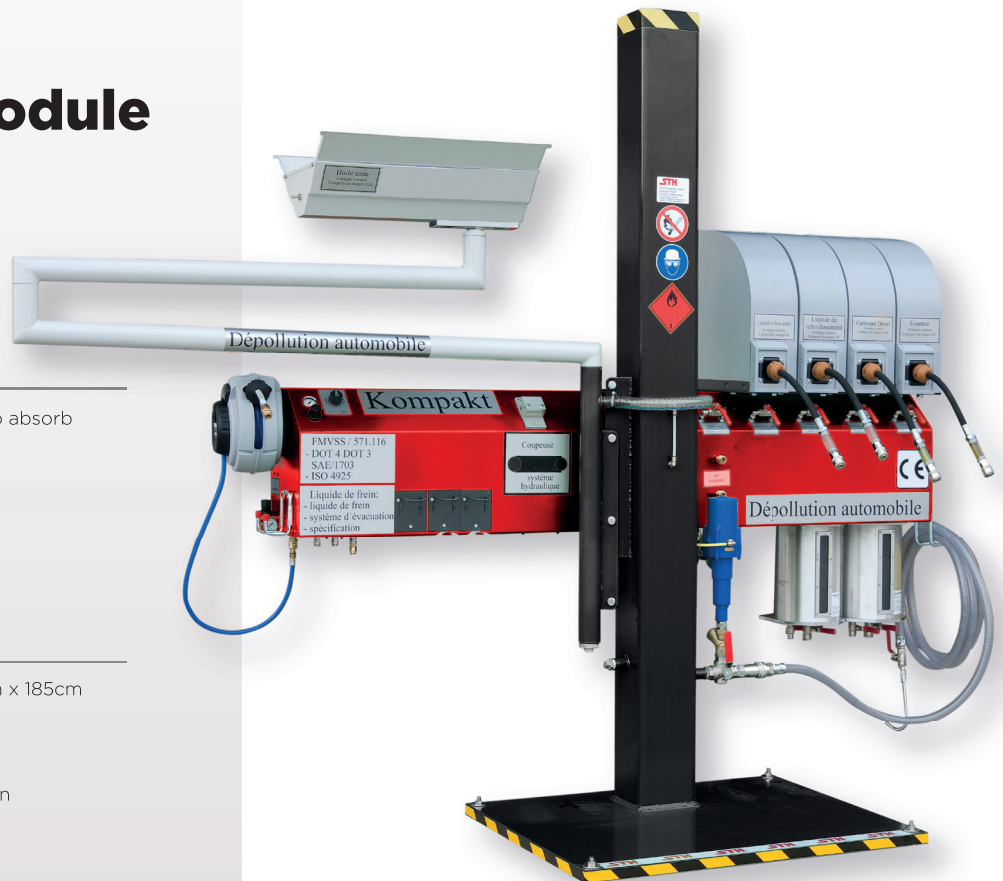

A space-saving and efficient system, equipped with high quality components. Individual combination options, adapted to the needs of the consumer.

> Configuration:

- petrol-/ diesel- tank drilling device to absorb liquid and gaseous substances
- dismantling tool set
- waste oil collection funnel
- brake fluid container 75 liters
- filter for cleaning of petrol and diesel

> Technical data:

- L x W x H: 110cm x 225cm x 185cm
- Weight: 1000 kg
- Processing time: 15 min/ Car
- Air requirement: 8 bar, 350l/ min

The Innovation of car depollution

DETAILS:

OPTIONS:

Fuel cylinder for cleaning of petrol and diesel

Automatic nozzle für re-use

Three-way control of the liquid

Tanks
